

# CoderDojo Athenry

September 2016

# Welcome Creators!

The word "Creators" is written in a large, bold, sans-serif font. Each letter is filled with a different color from a rainbow spectrum, creating a vibrant, multi-colored effect. The colors transition from blue on the left to red, orange, yellow, green, and finally purple on the right.

New group names for 2016

We're "Creators"

# What will we be doing?

Mostly game development in Unity

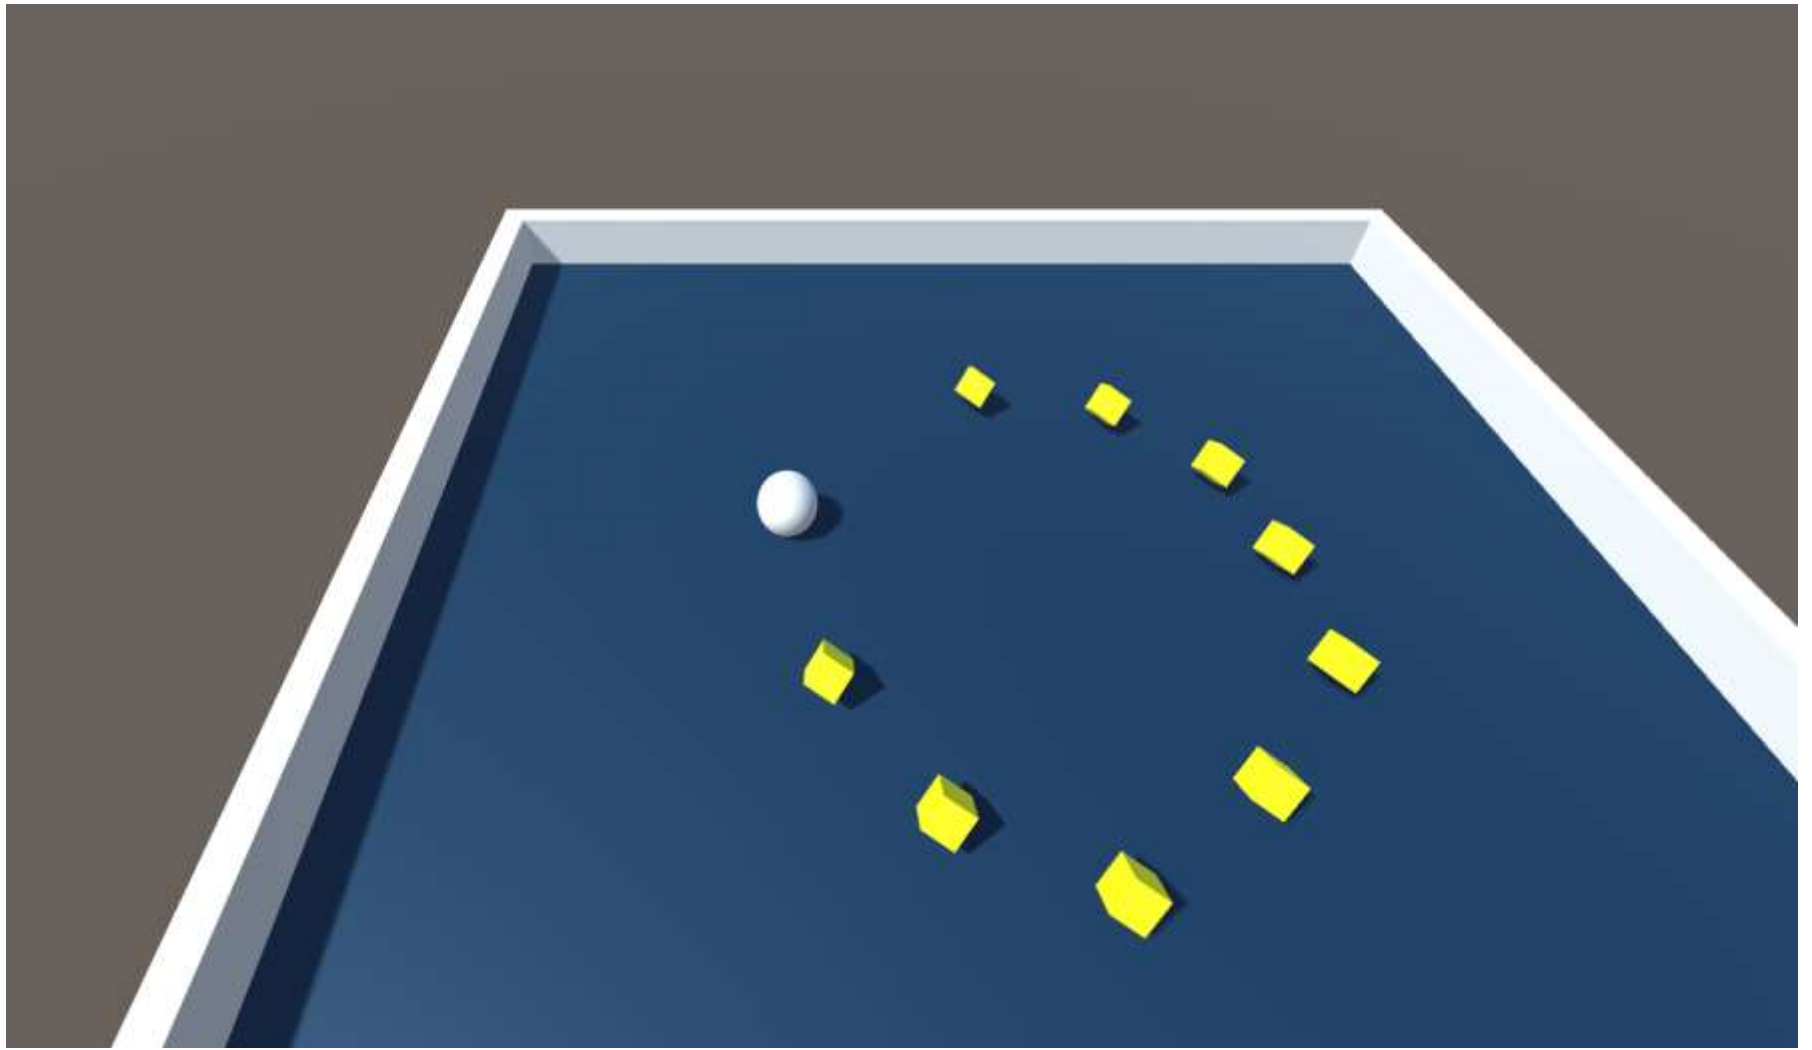

Also a little bit of:

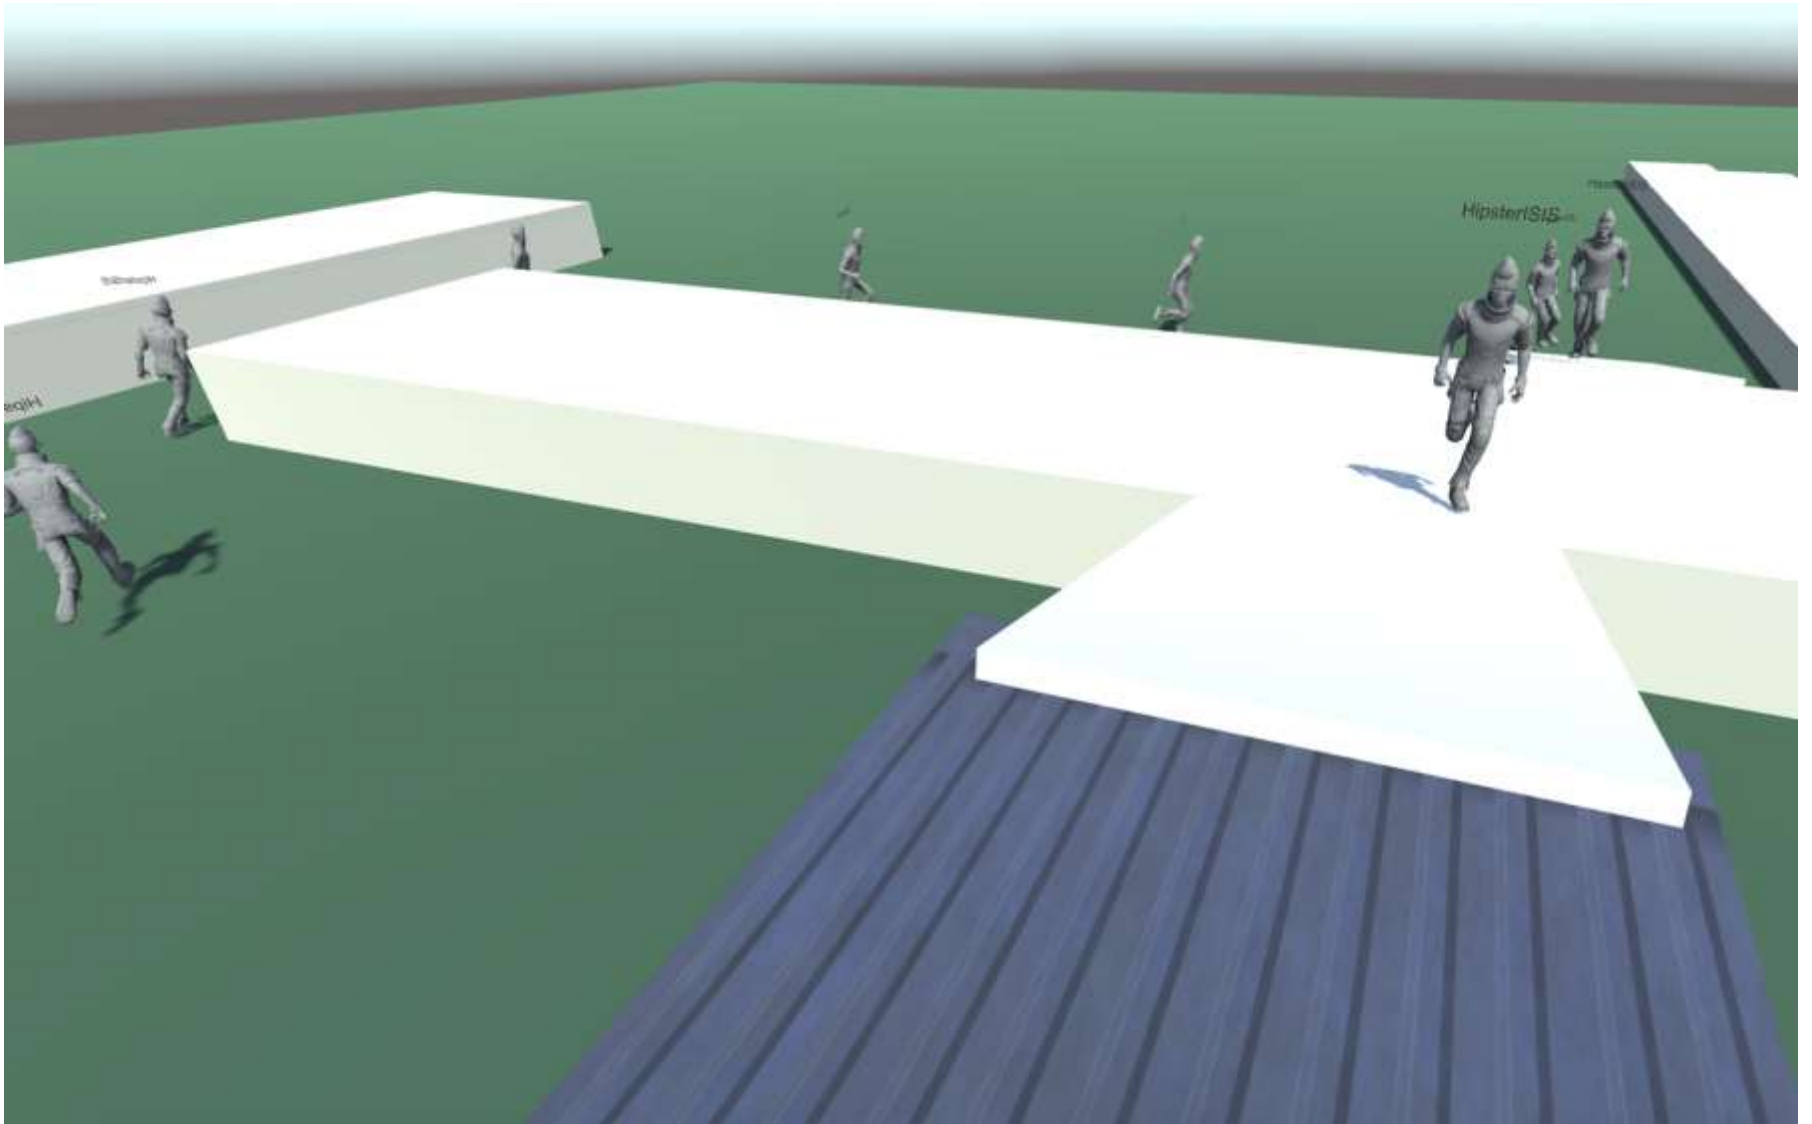

Blender (3D modelling)

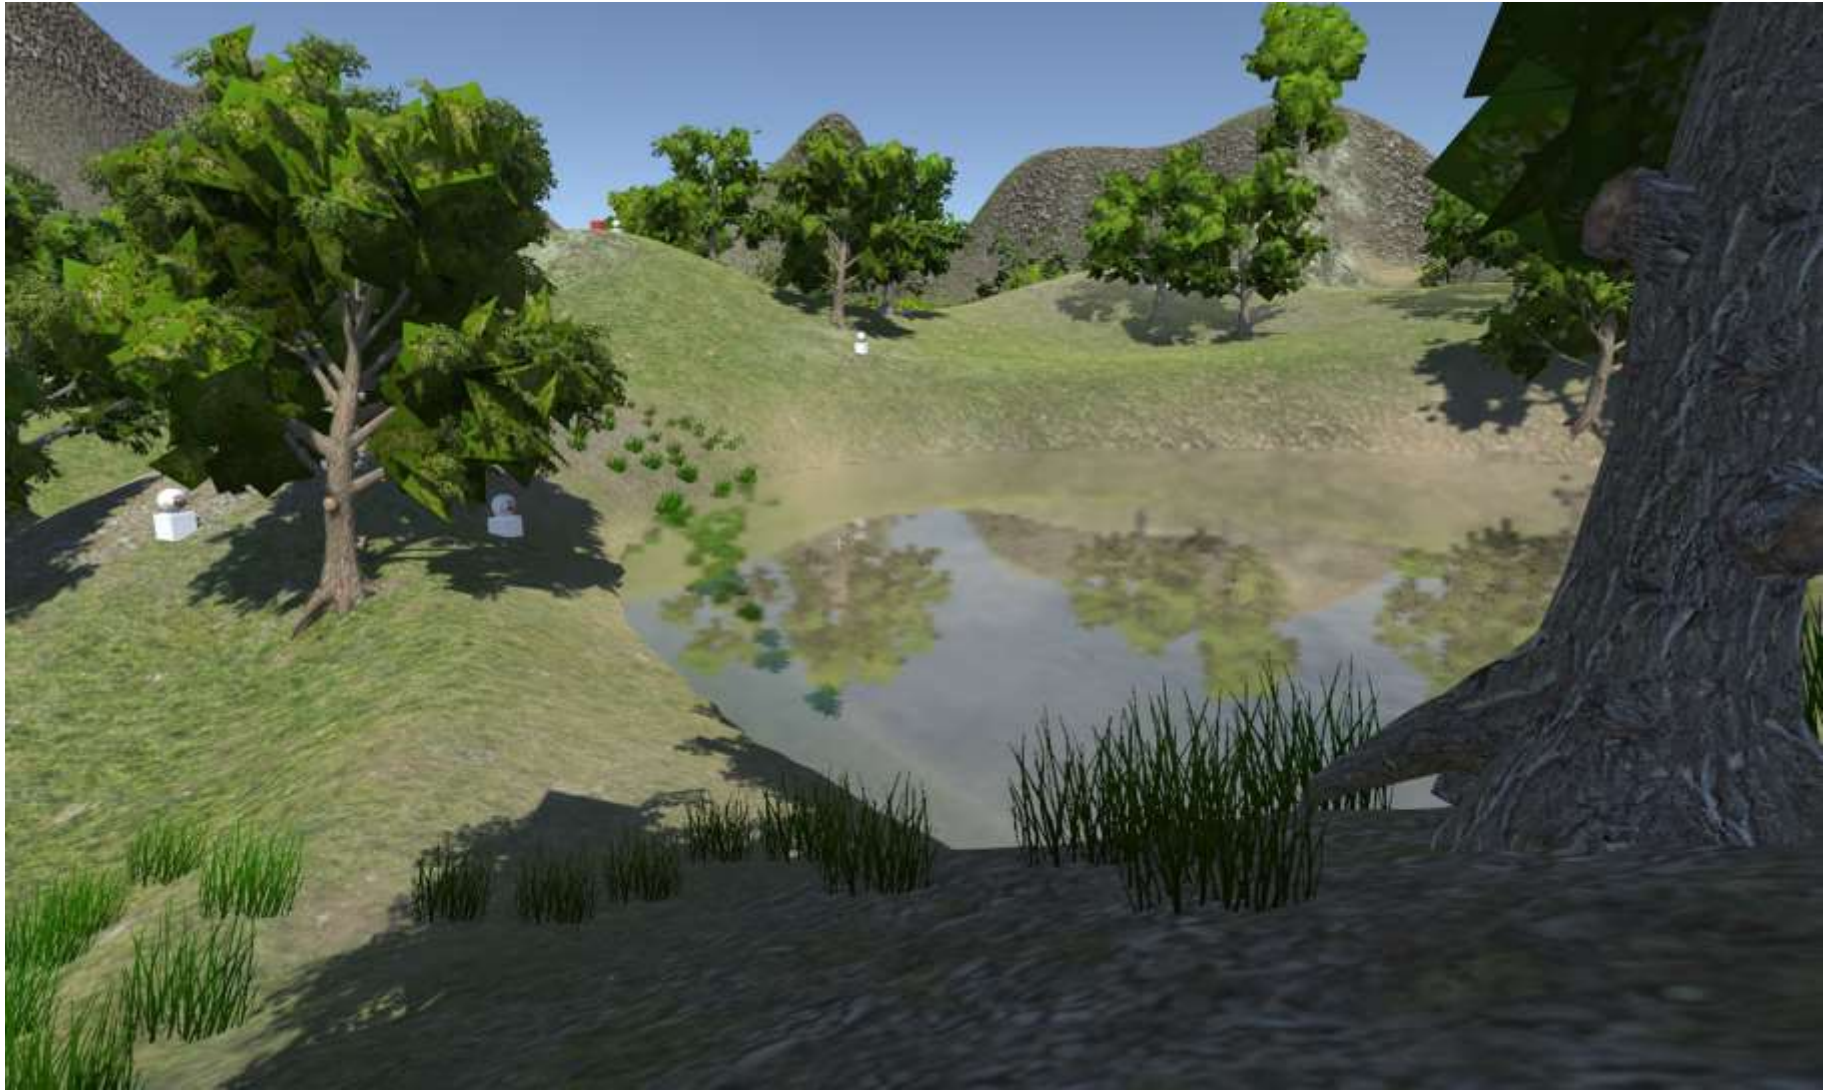

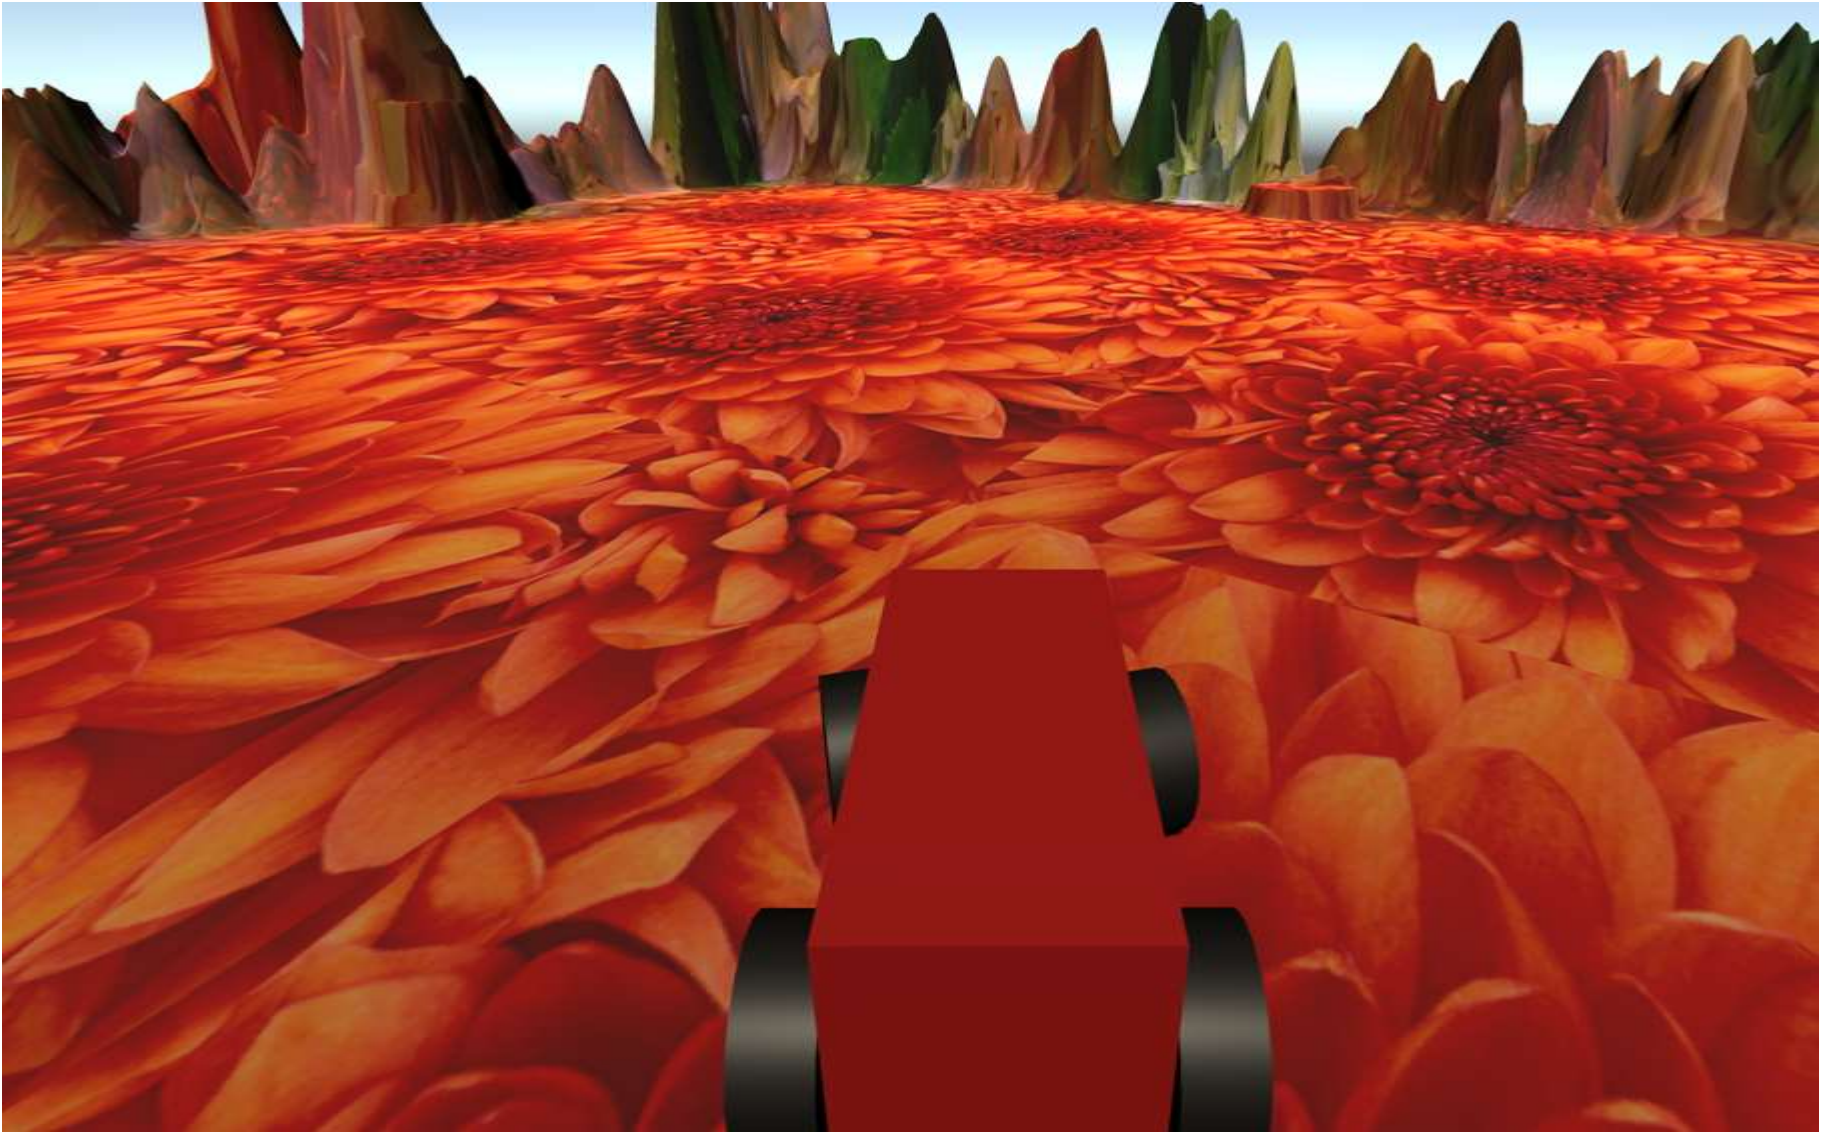

Audacity (sound recording and editing)

# Who's this group for?

This group will be most enjoyable for those that are:

Comfortable with the maths and physics we're going to use (secondary school level)

Already used to working with a programming language that requires you to **type** code (i.e **not** Scratch / AppInventor)

# Getting Prepared

You should do the following:

Install Unity ([www.unity3d.com](http://www.unity3d.com))

Register and create a Unity account.

If using a parent's email for this, make sure *you* know the Unity account password. This password *can and should* be different to the password your parent uses to access their email account

Install Blender ([www.blender.org](http://www.blender.org))

Install Audacity ([www.audacityteam.org](http://www.audacityteam.org))

# Looking Forward...

... to seeing you all next week!

(sorry, there won't be a puppy...)
